

BROWNS *BB* BABIES

Health Guarantee

This puppy is guaranteed to be in good health at the time of sale, and free from visible signs of infectious, contagious, or communicable diseases. A licensed veterinarian must examine your puppy by _____. If this puppy has not been examined by this date, this guarantee is null and void. So long as the purchaser has followed through with timely and proper immunizations, including rabies and wormings, has kept all records of these visits, and has not abused this puppy, we do offer a ONE YEAR GUARANTEE. A veterinary finding of any intestinal or external parasites shall not be grounds for declaring this puppy unfit for purchase. Ear infections, ear mites, worms, Coccidia, or Giardia are not serious health problems, if treated, and they are not covered by this guarantee. Hypoglycemia is a serious health problem, but is excluded from this guarantee. Hypoglycemia is generally caused by too much activity, and/or too little food, and is within your control. There are also environmental factors, for example: allergies, thyroid dysfunction, mange, and other autoimmune disorders that are not covered in this guarantee. This puppy is not guaranteed to be show quality, have descending testicles in males, or guarantee the color or size as an adult. We guarantee the puppy to be free from life-threatening congenital defects for one year from the date of birth. Should there be a problem, a veterinarian chosen by Brown's Babies will interpret the report. If that veterinarian concurs, a replacement puppy will then be exchanged for the original puppy, along with registration and medical records. THERE WILL BE NO CASH REFUNDS. Brown's Babies offers a replacement puppy only in the event of confirmed conditions stated above. Please note that Brown's Babies will not replace your puppy if it has received heart worm, flea, and/or tick preventative medications that have induced any neurological or any other related issues. Choosing these treatments is the purchaser's choice and is not encouraged by Brown's Babies. Brown's Babies must be notified **immediately** of the onset of the problem, including the report from the veterinarian stating said issue. If the puppy is proven to have a congenital defect within one year, and is returned to the breeder, Brown's Babies will replace the puppy as part of our guarantee. All veterinarian charges incurred by the purchaser are the sole responsibility of the purchaser. Under no circumstances, will these charges be paid by Brown's Babies. Brown's Babies assumes no responsibility for landlord's disapproval, allergies, or disagreement among household members regarding the puppy or dog. In purchasing this puppy, you agree to enter a spay/neuter agreement. This means that you agree to spay/neuter the puppy before one year (12 months) of age. You are agreeing to purchase this puppy as a "pet only". The spay/neuter agreement is legal and binding. Proof of spay/neuter in the form of a certificate from the veterinarian must be received by Brown's Babies by the time the purchased puppy is one year old (12 months). If we have not received the certificate by this date _____, legal action will be taken.
